

Lesson 1 - Assignments

1. Join the private course facebook group at

<https://www.facebook.com/groups/2397354933837015/>

- Introduce yourself to the group! Tell everyone what you do for your career and why you are taking this course.

2. Research a past catastrophic structural failure.

- What caused the structure to collapse?
- What are some lessons learned from this structural failure?

3. Research a past or current structural achievement.

- What stands out to you in this structure?
- What do you want to learn about when it comes to the design and construction of this structure?

You can send your assignment answers to us at info@structuralengineeringbasics.com along with some pictures. You can also post parts of your assignments to the Structural Engineering Basics Course private Facebook group to share with everyone.
